

TECHNICAL DATA SHEET - MARKKLOSS

DESCRIPTION

Markkloss is a reinforcement spacer for bottom reinforcement in reinforced concrete structures. The large "openings" in the spacer allow maximum concrete flow, ensuring that the reinforcement is fully embedded in concret.

The wide base and "tower-shape" of the spacer is designed to withstand high loads.

USAGE

Use on soft surfaces such as insulation, sand, gravel, plastic foil or sheeting, etc.

TECHNICAL INFORMATION

Color: Grey

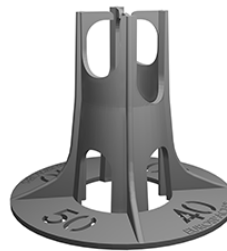

Material: A blend of PVC-free PP and PE (Polyolefin blend)

Concrete cover: 15-100 mm (See stock assortment in the table below)

Rebar: Ø4-16 mm

Material consumption: 3-5 pcs/m²

Package: Packed in cardboard boxes.
