SPECIALIST IN CONCRETE ACCESSORIES

TECHNICAL DATA SHEET - BTG.DISTANS ZICKZACK

DESCRIPTION

Concrete spacer in a zig-zag design with a continuous galvanized wire reinforcement to prevent breakage.The zig-zag shape ensures excellent stability on the surface.

APPLICATIONS

Suitable for use as a reinforcement spacer for heavy reinforcement and roll reinforcement in different types of construction projects.

When placing the spacer on slab formwork, it should be positioned with the pointed side facing the formwork. **Note: Despite this orientation, the spacer will still be visible even when the top is directed towards the formworksurface.**

TECHNICAL INFORMATION

Material consumtion: Ca 1-1,5 m/m²

Exposure classifcations: XC4, XD2, XF4, XA2

Concrete cover: 25-80 mm

Lenght: ca 700-800 mm

c/c: ca 0,8m

Frost and compression tested
