

TECHNICAL DATA SHEET - HYDRA SEALING PLUG

DESCRIPTION

The HyDra Sealing Plug is a revolutionary solution for sealing spacers and holes in concrete structures. The Sealing Plugs consist of a 'cap' of water-swellable thermoplastic rubber, and a hard core made of polyamide. The cap prevents water from seeping into the spacer, the core provides mechanical fixation up to 6 bar water pressure.

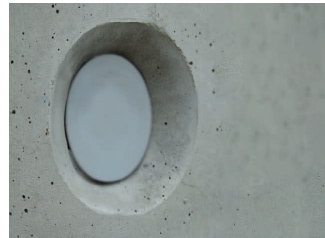

USAGE

Place the sealing plug in the formwork hole/spacer.

Hammer in the sealing plug with a single blow.

No after-treatment or additional finishing needed.

TECHNICAL INFORMATION

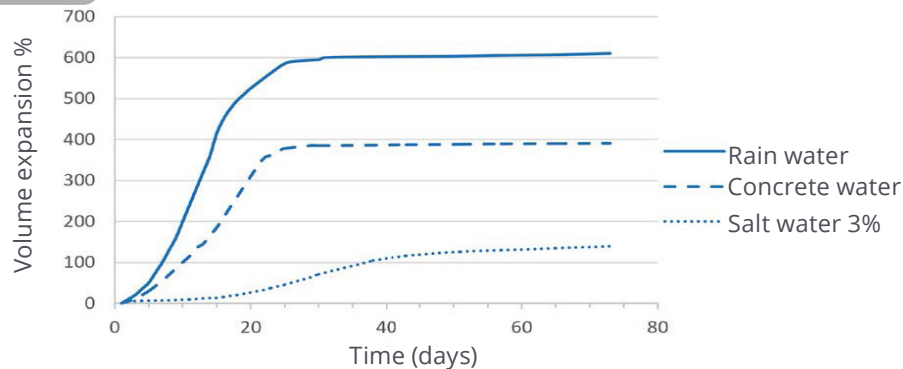

Color (body): Grey

Color (swellable part): Blue

Material (body): Polyamid plastic

Material (swellable part): Thermoplastic Rubber

Waterpressure: 100 % waterproof up to 6 BAR

PRODUCT RANGE

Item.nr	Description	Seal Ø	Pcs/bag	Pcs/crt	Pcs/pallet	Unit
