

TECHNICAL DATASHEET - WINTERGRADE

DESCRIPTION

HyDra Winter is an anti-freeze additive for HyDra Rubber LM. Can be used down to temperatures as low as -15°C.

APPLICATION

Add one container 200ML HyDra Winter to one pail of HyDra Rubber LM 20KG and mix.

RESTRICTIONS

Obey the safety precautions when applying by wearing gloves, eye protection and other suitable protective equipment. Please refer to the SDS sheet for more information. Use HyDra Winter only when the ambient temperature is below 0°C during installation, or below 0°C during the curing phase of the product.

STORAGE

Keep container tightly closed. Keep container in cool, well ventilated area, away from heat and sources of ignition.

TECHNICAL DATA

PROPERTIES	TYPICAL RESULTS
Color	Yellow- Brown
Physical properties	Liquid
Specific gravity (liquid), g/cm ³	CA. 1.0
Odor	None
