

TECHNICAL DATA SHEET - STAINLESS HEXAGON NUT

DESCRIPTION

Stainless steel hexagon nut intended for use with form tie systems in the casting of walls, columns, and other concrete structures where high corrosion resistance and secure locking are required. Manufactured from A4 stainless steel (EN 1.4401 / AISI 316), making it suitable for use in aggressive environments such as coastal areas.

APPLICATIONS

- Locking of tie rods for wall and column formwork
- Concrete casting in wet or chemically exposed environments
- Temporary structures where stainless steel is required
- Compatible with DW15

KEY FEATURES

- High tensile and compressive strength
- Made from acid-resistant A4 (316) stainless steel
- Fully compatible with standard form tie systems
- Excellent corrosion resistance
- 3.1 material certificate (DIN EN 10204)

PRODUCT RANGE

Item.nr	Name	Rod Ø(mm)	Hex (mm)	Length (mm)	Unit
1092015	Stainless Steel Hexagon Nut 15x50 (A4 EN 1.4404 / AISI 316)	15	30	50	pcs
